WHAT WILL YOU ASK ME ABOUT?

- **Housing**
  - Affordability
  - Safety

- **Transportation**
  - Public transportation options
  - Affordability
  - Reliability
  - Safety
  - Street & sidewalk maintenance

- **Neighborhoods**
  - Nearest grocery store
  - Nearest park

- **Health**
  - Health insurance coverage
  - Travel to doctors office

- **Family/Relationships**
  - Childcare options
  - School
  - Relationships

- **Work**
  - Employment opportunities
  - Job assistance
  - General Assistance
  - Group membership & participation

- And a few typical research demographics such as age, gender, and race

CORES
Community Resources Study

Working with communities to meet needs, strengthen the availability of local resources, and strengthen families

INTERVIEWS

We will be doing interviews throughout 2021.

About 600 people were randomly selected from different areas of the country - you cannot be replaced by anyone else!

The interview takes about 60 minutes and you will be given a token of appreciation for completing the interview.

Participation is completely voluntary.

WHAT IS CORES?

CORES (Community Resources Study) is an important academic study that examines health and social services issues facing households in our communities.

The goal is to understand how best to work with communities to meet needs and strengthen the availability and use of local resources.

We are interviewing residents to build on knowledge about what works and what doesn't - no matter what level or type of services you need or use now.

WHY SHOULD I PARTICIPATE?

Policymakers and researchers are interested in hearing from people in different communities with a wide range of experiences. Your unique experiences and point of view are extremely valuable and you cannot be replaced.

QUESTIONS?

If you have any questions, or to set up an interview, please contact the study office at the University of Wisconsin Survey Center.
